Restriction Requirement

1
2 Claims 1-19 are pending in this application.

3
4 Restriction to one of the following inventions is required under 35 U.S.C. § 121:

5
6 I. Claims 14-19, drawn to a semiconductor device, classified in Class 257,
7 subclass 301.

8 II. Claims 1-13, drawn to a process of making a semiconductor device
9 apparatus, classified in Class 438, subclass 427.

10 The inventions are distinct, each from the other because of the following
11 reasons:

12 Inventions II and I are related as process of making and product made.
13 The inventions are distinct if either or both of the following can be shown: (1) that the
14 process as claimed can be used to make other and materially different products or (2)
15 that the product as claimed can be made by another and materially different process
16 (MPEP § 806.05(f)). In the instant case, unpatentability of the group I invention would
17 not necessarily imply unpatentability of the method of the group II invention, since the
18 device of the group I invention could be made by processes materially different than
19 that of the group II invention, for example, in claim 4, wherein the planarization process
20 is ablating. Note specifically In re Thorpe et al. as detailed below:

21
22 Even though product - by process claims are limited by and defined by the process, determination
23 of patentability is based on the product itself. The patentability of a product does not depend on
24 its method of production. If the product in the product - by - process claim is the same as or
25 obvious from a product of the prior art, the claim is unpatentable even though the prior product
26 was made by a different process. In re Thorpe , 227 USPQ 964, 966 (Fed. Cir. 1985) (citations
27 omitted)
28

29 Because these inventions are distinct for the reasons given above and, as
30 shown by the above different classifications, the fields of search are not co-extensive
31 and separate examination would be required, restriction for examination purposes as
32 indicated is proper.

33 Applicant is advised that the response to this requirement to be complete must
34 include an election of the invention to be examined even though the requirement be
35 traversed (37 C.F.R. 1.143).

36 Applicant is reminded that upon the cancellation of claims to a non-elected
37 invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if

Restriction Requirement

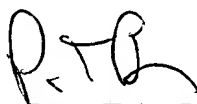

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

Papers related to this application may be submitted directly to Art Unit 2822 by facsimile transmission. Papers should be faxed to Art Unit 2822 via the Technology Center 2800 Fax Center located in Crystal Plaza 4, room 4 - C23. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Technology Center 2800 Fax Center numbers are (703) 308-7722 and (703) 308-7724. The Technology Center 2800 Fax Center is to be used only for papers related to Technology Center 2800 applications.

Any inquiry concerning this communication or any earlier communication from the Examiner should be directed to Art Unit 2822's Supervisory Patent Examiner **Peter Toby Brown** whose telephone number is **(703) 308-4083**.
